

ISLAND HERITAGE TRUST

ANNUAL REPORT 2014

The Land Trust of Deer Isle & Stonington, Maine.

The Year in Review

2014 for Island Heritage Trust saw both continuing and new events; Winterfest, a waterfowl cruise in March (yes March!), Island Cleanup, Wings Waves and Woods, Lupine Festival, the 75th Anniversary of the Bridge, Fishermen's Day, our Annual Meeting, the Annual Shore Dinner & Benefit Auction, our Ice Cream Social, and the special "Thank You Cruise". Meanwhile, we offered a number of interesting speakers over the year including Tom Wessels of Antioch New England Graduate School, Sue Shaw of MERI on and Todd West, DISHS Principal, at our annual meeting talking about the Marine Studies Pathway.

2014 was time to examine the trust's mission and our presentation to the world, or branding. This started as a desire to unify all our signs and brochures, but it grew into a deeper reflection on the recently changing visions of land trusts. After consulting with experts in the field who volunteered their time, we held a board retreat, and devoted a Community Advisory Board to the topic. This led us to focus on what is called "Community Conservation" defined as: "land conservation...that embraces and is grounded in local cultural ... is ..responsive to the concerns and priorities of the local communities..., contributes to healthy and sustainable communities by... improving people's health

and quality of life, providing clean water and access to healthy food, ... generating economic benefits, and land based education." –The Center for Whole Communities.

This still involves preserving natural areas, but to do it in the context of the wider needs of the

community as a whole.

Our **New Mission Statement** emerged: "IHT contributes to the well-being of the island community by conserving its distinctive landscapes and natural resources, maintaining public access to valued trails, shoreline and islands, and by providing educational programming for all ages."

We are working on expanding our collaborations with other island organizations, the closest of

which is literally in our back yard, the Island Historical Society, and are moving towards more collaborative ventures with them. We created paths and signage that better connects us physically, and we often share each other's indoor spaces. In the future we hope to be able to share some programming that bridges both our missions, and also look forward to collaborating with other groups.

A big move in January, 2013, was hiring an Education Director, Martha Bell, and later forming an education advisory board. Martha has been wonderful in working with nature educator and board member Jane Osborne, and the program committee, in developing new children's and family programs. She's been working with the Marine Studies Program, building solid relationships with the elementary school teachers, and leading summer nature programs for the kids.

In all of these endeavors, we hope to continue to preserve the natural environment in which these activities take place on the island and to honor the fact that "Nature is not a place to visit; it is home." Gary Snyder.

PS: Check out the 7th grade grass restoration project on the causeway beach and the fine benches made and donated by Cory Eaton to IHT for many of its preserves.

Stewardship Committee Annual Report 2014

The most important function of this committee is to insure that IHT complies with our legal responsibility to manage for public benefit our 27 Conservation Easements which protect 490 acres and our 20 owned properties which protect an additional 460 acres. The total protected shoreline now stands at 21.7 miles and includes 18 islands! This large effort involves IHT Staff and many volunteers. Two of the Preserves, Settlement Quarry and the State owned Tennis Preserve, now have "Friends of" groups to assist with management which are a huge help in carrying out day-to-day summer operations.

Beyond IHT's primary stewardship effort, the Stewardship Committee coordinated other diverse activities. Cody Eaton, in completing his Eagle Scout requirements, constructed and installed 8 handsome and sturdy wooden benches for IHT preserves. IHT staff assisted the 7th grade with a Beach Grass Protection Project at the Causeway Beach. You may have noticed the green flags and signs that they installed as part of the project. Working with Ken and Marnie Crowell, a pilot project using electronic technologies (QR Codes) to provide an alternative source for natural history information was completed at Scott's Landing. Given the poor connectivity on the island, this initiative will not be implemented at other Preserves until connectivity improves. Students from the Maine Maritime Academy in Castine volunteered to assist with the construction of a new board walk at Scott's Landing. Staff and volunteers worked hard on new trails on the Town of Stonington's Holt Mill Pond Preserve.

Two of IHT's Conservation Easements were amended – a lengthy legal process that must provide additional public benefits. One of these amendments now permits legal public access to the beach at the southwest end of the Oceanville Bridge.

During this year, IHT said farewell to Stewardship Director, George Fields, who took a full time position with Blue Hill Heritage Trust and IHT welcomed Janna Newman as Stewardship Director. Both of these staff members have served IHT very well.

Ann Hooke, Chair Stewardship Committee

Land Committee report 2014

During 2014 we worked with landowners on two acquisitions and four conservations easements. In January of 2014 we negotiated an option with Larry Pickering on the parcel known as Lily Pond 2, for which IHT then raised funds for purchase and future stewardship costs.. The second project for acquisition, also initiated early in 2014, is two-acre Whig Island near Deep Hole in Long cove. Two of the easements, begun in 2010, are now ready for signing. They will protect abutting properties. In addition to the usual back-and-forth between land owners and IHT on wording and the marking off the excluded building envelopes, these easements required surveying of an access for shellfish harvesters.

While we work only with willing land owners, the committee continues to look for ways in which to be more proactive. The conservation values of protected lands are enhanced when they can be effectively enlarged through abutting easements or linked via habitat corridors. During our monthly meetings, with support of Janna's GIS skills, we evaluated all parcels abutting preserves and easements. These land owners will receive letters asking them to consider protecting the future of their land through donation or conservation easement.
